FundPartner AM S.A.S. (the "**AIFM**") is required to produce and publish this document by Regulation (EU) 1286/2014 of the European Parliament and the Council on key information documents for packaged retail and insurance-based investment products (the "**Regulation**"). What are the risks and what could I get in return?

Risk Indicator

Lower risk **Higher risk**

The risk indicator assumes you keep the product for eight years. The actual risk can vary significantly and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.
This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. Blackstone Bepimmo is denominated in Euro (€). You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This investment involves a high degree of risk and should only be made if an investor can afford the loss of its entire investment. There are no guarantees or assurances regarding the achievement of investment objectives or performance. This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Based on the thirteen-year performance of the following proxy: (A) for the period prior to the launch in October 2021 of Blackstone European Property Income Fund (Master) FCP ("**BEPIF**"), the Luxembourg fund which invests in parallel with Blackstone Bepimmo, (1) pre-July 2015: INREV European ODCE Index net of fees and other costs; and (2) July 2015 – September 2021: weighted average (on a monthly basis) returns of (i) 90% in European Core+ real estate fund based on BPPE and its predecessor separately managed accounts ("**SMAs**") and (ii) 10% in European debt based on the ICE BofA Euro High Yield Index. For (2), management and performance fees payable to the fund sponsor reflect that of BEPIF. The INREV European ODCE Index, BPPE and the applicable SMAs calculate a quarterly NAV and, for the purposes of this document, the returns have been converted to monthly returns, assuming even performance across each month during the quarter, and not accounting for currency fluctuation in some SMAs with non-Euro exposure early in the life of those SMAs; (B) from October 2021 to December 2021, the actual performance of Blackstone European Property Income Fund SICAV, a Luxembourg feeder fund which invests in BEPIF and (C) from January 2022, Blackstone Bepimmo's actual returns.

No upfront fees are payable to Blackstone Bepimmo when you acquire units in Blackstone Bepimmo, although certain financial intermediaries, insurance entities and other institutions may directly charge their clients an upfront selling commission, placement fee, subscription fee or similar fees of generally up to 3.0% of the subscription price. Please note that the performance scenarios presented in this document do not include, where applicable, such upfront fees. There may be other fees that a financial intermediary, an insurance entity or an institution charges its clients in respect of an acquisition of shares in Blackstone Bepimmo or services it provides to its clients in relation thereto.

Where performance calculations reveal a stress scenario to be more favourable than the unfavourable scenario, the stress scenario will be adjusted to match the unfavourable scenario.

In accordance with regulatory requirements, performance scenario figures reported in monetary terms are rounded to the nearest 10 EUR (or equivalent currency), and performance scenario indicators in percentages to one decimal place.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

For each scenario described hereafter, please refer to the relevant proxy below:

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 8 years
Total costs	€213	€3,105
Annual cost impact (*)	2.1%	2.1% each year

* This illustrates how costs reduce your return over time. For example it shows that if you exit at the illustrative recommended holding period (8 years), your average return per year is projected to be 9.1% before costs and 6.8% after costs.

Total costs: Redeemed units held less than one year will be subject to a 5% deduction from NAV (calculated as of the relevant Redemption Date). This does not account for that potential deduction.

Exit costs: Redeemed units held less than one year will be subject to a 5% deduction from NAV (calculated as of the relevant Redemption Date). This does not account for that potential deduction.

Management fees and other administrative or operating costs: Certain organisational and offering expenses were advanced by the fund sponsor through the first anniversary of the date on which Blackstone Bepimmo or any other member of the fund complex first accepted subscriptions, and are being reimbursed ratably from October 2022. Additionally, the Investment Manager has elected to voluntarily apply a discretionary deferral mechanism by capping certain fund expenses and organisational and offering expenses to 0.50% (annualised) of the NAV of the fund complex. These expenses and the fee paid by Blackstone Bepimmo to its AIFM are included in the "operating costs".

How long should I hold it and can I take money out early?

Recommended holding period: There is no recommended holding period, but in order to make the product comparable to others an illustrative recommended holding period of 8 years has been adopted in this document Units in Blackstone Bepimmo are suitable only as a long-term investment for persons of adequate financial means who do not need near-term liquidity from their investment. We do not expect there to be a public market for Blackstone Bepimmo units and thus it may be difficult for you to sell your units. Redemptions are expected to be offered each month at the NAV per unit as of the last calendar day of the month (each a "**Redemption Date**"). Units held less than one year will be subject to a 5% deduction from NAV.

Redemption requests must be provided by 5 p.m. Central European Time on the first business day of the month on which the Redemption Date falls. Settlements of unit redemptions are generally expected to be within 60 calendar days of the Redemption Date. Redemption requests may be rejected, in whole or in part, in exceptional circumstances and not on a systematic basis. Redemptions are also subject to limits in relation to redemption requests exceeding certain thresholds, and redemption fees. Blackstone Bepimmo may make exceptions to, modify or suspend the plan. The performance scenarios do not account for the 5% deduction described above.
